

Cookie Policy

We use cookies to enhance your experience with us. Cookies give us an understanding for how our web service is being used and helps us with development and improvements. cookies are passive text files that are stored in the internet browser on your device such as your computer, mobile phone or tablet, when you are using our services. See also our Privacy Policy regarding the handling of your personal information. Your browser or device will usually allow you to change the settings for the usage and extent of cookies, as well as for cookies currently being stored. Please see your browser or device reference information to understand how to adjust your settings.

_tt_session - Strictly Necessary

We use it to keep the context of a user (e.g. keep them logged in).

cid - Strictly Necessary

We use it for identifying candidates in our chat so that you can resume conversation after leaving the jobsite or careersite page.

referrer - Targeting Cookies

We use it to identify the address of the webpage that is linked to us.

cookieconsent_dismissed - Performance

We use it to not show you the cookie consent bar once you accept it.

ti - Performance

We use it to know which pages a visitor is browsing on.

Cookies used by our service providers

We use the following service providers to analyse the use of the Services. Each service provider gathers information about the Services by means of cookies and this information is used to create reports with usage information. You can find information about the service providers' privacy policies and practices at the URLs below.

Google Analytics - Performance

Strictly Necessary

These cookies are essential in order to enable you to move around the website and use its features, such as accessing secure areas of the website. Without these cookies, services such as shopping baskets and e-billing cannot be provided.

Performance Cookies

These cookies collect information about how visitors use a website, for instance which pages visitors go to most often, and if they get error messages from web pages. These cookies don't collect information that identifies a visitor. All the information these cookies collect is aggregated and therefore anonymous. It is only used to improve how a website works.

Functionality Cookies

These cookies allow the website to remember choices you make (such as your user name, language or the region you are in) and provide enhanced, more personal features. For instance, a website may be able to provide you with local weather reports or traffic news by storing in a cookie the region in which you are currently located. These cookies can also be used to remember changes you have made to text size, fonts and other parts of web pages that you can customise. They may also be used to provide services you have asked for such as watching a video or commenting on a blog. The information these cookies collect may be anonymised and they cannot track your browsing activity on other websites.

Targeting Cookies

These cookies are used to deliver adverts more relevant to you and your interests. They are also used to limit the number of times you see an advertisement as well as helping measure the effectiveness of the advertising campaign. They are usually placed by advertising networks with the website operator's permission. They remember that you have visited a website and this information is shared with other organisations such as advertisers. Quite often targeting or advertising cookies will be linked to site functionality provided by the other organisation.
